

Wellness Aesthetics Longevity

Innovating for a Better Tomorrow

Founded over 30 years ago in Prague, Czech Republic, BTL began with a vision to improve the quality of life through **advanced medical technology**. From these humble beginnings, BTL has grown into **a global leader in medical solutions**, constantly pushing the boundaries of innovation.

With **direct offices in more than 80 countries**, we ensure that our cutting-edge products are accessible to customers around the globe, with each office dedicated to **providing personalized support**.

As a privately held company, BTL enjoys the freedom to focus on long-term goals and invest in **breakthrough innovations**, delivering **superior medical solutions** that healthcare practitioners trust and patients love.

What Sets Us Apart

						
30+ Years of Experience	80+ Offices	500+ Engineers	5 R&D Centers	500,000+ Installed Systems	200+ Clinical Studies	300+ Patents

Expert Opinions

"We used to rely solely on lower blepharoplasty to effectively treat patients' eye bags. EMFACE now provides me with a non-invasive alternative and my patients are delighted with their results."

Miss Sherina Balaratnam, MBBS, MRCS, MSc

"EMSCULPT NEO is operator independent, takes half the time, patients don't have to go first for fat treatment, and then again for muscle treatments. It does everything in the 30-minute session, which makes it is more cost and time effective. And the most important thing, patients don't have to wait for months to feel a difference."

Bruce Katz, M.D.

"The EXION platform has tremendous utility for our practice. The ability to provide RF microneedling at the depth greater than the extent of the needles due to the physics and technology is remarkable and the ability to increase hyaluronic acid content is a game changer!"

David E. Kent, M.D.

"We place all our stress incontinence and overactive bladder patients on this chair. They are loving the 28-minute treatments. It is so easy sitting fully clothed on the EMSELLA, reading a magazine, and getting a full pelvic workout without the sweat!"

Red Alinsod, M.D.

EMSCULPT^{neo}®

Body Contouring

This leading body-shaping procedure combines RF and HIFEM technologies to eliminate fat and build muscle in a single session, with no downtime.

30%

Less Fat*
